With American, you get a lot more airline

Get more rest and privacy in First Class

Our First Class sleeper seats, found on our Boeing 777 aircraft, are designed to give you maximum comfort in any position. In addition, the *Flagship Suite*® seats on selected 777 flights provide a unique environment in which to work, relax or sleep. Each seat reclines to create a fully flat 6' 6" bed with surrounding privacy divider. You can also fine-tune your seat position with an electronically controlled legrest and footrest, and adjust a lumbar panel for back support. For entertainment, enjoy a selection of up to 20 films on your own personal video player. Or slip on your Bose® QuietComfort® Acoustic Noise Cancelling® headset to produce superior sound quality from our audio selections. If you brought work along, a convenient laptop power port is available.

Get more comfort and style in Business Class

Business Class on all of our transatlantic aircraft was designed with your comfort in mind. With features like a six-way adjustable headrest, lumbar support, legrest and footrest, you'll find it's easy to get comfortable in these oversized seats. We have removed rows of seats to give you more room to stretch out. With up to five feet of space between your seat and the one in front, experience the comfort of a 150-degree seat recline, so you'll arrive at your destination well-rested and refreshed. On selected aircraft, Business Class also offers power ports for your laptop, individual satellite telephones, Bose QuietComfort Acoustic Noise Cancelling headsets for your listening pleasure and on selected aircraft, DVD players so you can enjoy a selection of up to 20 films.

Get More Room Throughout EconomySM

Your trip should never be cramped or uncomfortable. That's why we've removed rows of seats from Economy Class on our transatlantic aircraft — to give you more space throughout the cabin. It's a feature found only on American Airlines. Those extra inches add up to more legroom, more space for dining and working and more room to relax during your flight. You'll also enjoy the comfort of adjustable leather headrests and, on Boeing 777 aircraft, individual seatback video screens for your entertainment. Satellite telephones and power ports will help keep you connected, and our excellent selection of audio and video programmes always helps to pass the time.

Aircraft type, cabin configuration and inflight service may vary as we continue to improve our international service.
